

ECOPERLA

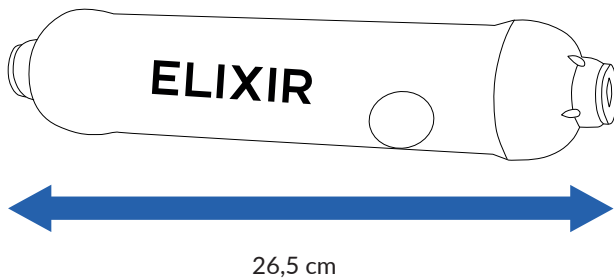

## ECOPERLA ELIXIR REVITALISING CARTRIDGE

### DESCRIPTION

The EcoPerla Elixir water revitalising cartridge is used with standard kitchen filters used in households. Its main task is to enrich water with high concentration of magnesium and ensure high, alkaline pH. After treatment, water gains health promoting properties. EcoPerla Elixir contains magnesium in its purest form.

### CHARACTERISTICS

- Much more effective than traditional mineralisers
- Raises water pH up to 9.5 (value depends on raw water parameters)
- Enriches water with large amounts of magnesium

### TECHNICAL SPECIFICATIONS

Water pH*	8,5-9,5
Minimum temperature	2 °C
Maximum temperature	42 °C
Maximum flow rate	2,8 lpm
Magnesium hardness	150 mg CaCO <sub>3</sub>
Conductivity	250 microsi
Replacement after	approx. 12 months

\* The value depends on raw water parameters
