

ECOPERLA ELIXIR

YOUR PROBLEM

Do you want to take care of your body? Would you like to drink high-quality water rich in magnesium? Do you need a filter which can raise your water pH level and enrich water with minerals? Are you looking for the easily absorbed water with health-promoting properties?

OUR SOLUTION

Thanks to the Ecoperla Elixir water revitalising filtering cartridge, the filtered water becomes alkaline and its pH rises up to 9.5. Besides, the cartridge enriches water with magnesium, which is very important for the human body. Its effect has been proven in numerous tests.

GENERAL INFORMATION

Ecoperla Elixir is a modern water revitalisation cartridge for kitchen filters. It provides water with large concentration of magnesium and a high, alkaline pH value. The cartridge may be used instead of a water mineraliser. Regular consumption of water treated in this way brings numerous health benefits.

Water pH*	8.5-9.5
Minimum temperature	2 °C
Maximum temperature	42 °C
Maximum flow	2.8 lpm
Magnesium hardness	150 mg CaCO ₃
Conductivity	250 microsi
Replacement intervals	ca. 12 months

*the value depends on the raw water parameters

MEDIUM

The filtering medium used inside Ecoperla Elixir supplements water with large quantities of magnesium and hydrogen molecules.

Hydrogen molecules - Hydrogen has antioxidant properties. It protects healthy cells from free radical attack. It also slows down the ageing process and cell death. The reaction of hydrogen with magnesium results in the increased water pH up to 9.5.

Magnesium - the cartridge enriches water with large quantities of magnesium, which no other household water filter could provide before. This dose is up to 10 times higher compared to standard mineralisers.

USE

- Compatible with all standard kitchen filters (it can be installed directly for raw water treatment)
- Can be used instead of a water mineraliser
- Like water ionisers, it produces alkaline water with an extremely high and health-promoting pH

DESIGN

- Protects against free radicals
- Slows down the ageing process
- Improves well-being
- Accelerates body regeneration
- Prevents excessive stress
- Helps regulate the muscular system
- Strengthens the skeletal system and teeth
- Helps maintain proper cholesterol levels
- Prevents heart disease

YOU CAN DRINK THE WATER OF TOMORROW NOW
