

# ECOPERLA

## ECOPERLA NANO NANOFILTRATION

---

### DESCRIPTION

The EcoPerla Nano nanofiltration system protects water ionisers and purifies water in households. After filtration some minerals remain in water, making it perfectly suitable for the ionisation process and not causing any damage inside the device. EcoPerla Nano ensures reduction in water hardness.

### CHARACTERISTICS

- Small amount of reject water
- Highly efficient nanofiltration membrane
- Highly efficient cartridges with long operating life

## TECHNICAL SPECIFICATIONS

Filter dimensions (H/W/D)	36,5 x 40,5 x 21,5 cm
Tank dimensions (H/DIA)	42 x 28 cm
Membrane	90 GPD
Efficiency	340 l/dobę, 14 l/h
Tank volume	16 l
Pressure (min/max)	2,5/6 bar
Temperature (min/max)	2/40 °C
